Summary

Customer Success Manager and growth strategist with 3+ years in B2B MarTech SaaS across customer engagement, personalization, and experimentation. Built CS motions from zero across three product lines and managed an \$8M+ portfolio, owning customer outcomes from technical onboarding through renewal and expansion. Combines high agency, strategic customer leadership, commercial ownership, and hands-on execution in high-stakes, fast-moving, ambiguous environments.

Skills

Experience

Career Transition: US Relocation, San Jose, CA

January 2025 - Present

- Built practical AI and GTM fluency after relocating to the US and completing work authorization in June 2026, creating live workflows with n8n, Lovable, Clay, and Claude while engaging with the Bay Area AI ecosystem.

Customer Success Manager, Enterprise

August 2021 - January 2025

Netcore Cloud

Mumbai, India

- Scaled portfolio NRR from \$6M to \$8M and independently closed \$600K+ in expansion by qualifying CSQs, expanding paid features and channels, and leading renewals and commercial negotiations.
- Inherited Boxx.ai (Product Experience, PX) amid low retention, churn, and minimal CS coverage, and improved GRR from 60% to 85% within six months by building its CS motion from scratch and launching first use cases, including personalization, across eight accounts, closing \$15K in early expansion.
- Managed 25+ enterprise, mid-market, and growth-stage accounts across D2C, e-commerce, BFSI, and travel, including six at \$500K+ ACV, by building trusted relationships from frontline operators to C-suite stakeholders.
- Maintained 88% retention and drove paid feature adoption across 60% of the portfolio by combining success plans, account health signals, early risk intervention, and executive business reviews grounded in ROI and expansion priorities.
- Championed 30+ product roadmap additions by serving as the voice of the customer and translating feedback into structured business cases with Product and Engineering.
- Owned full-cycle technical onboarding across SDK, API, and webhook setups, coordinating customer, Product, and Engineering handoffs, timelines, and approvals to keep go-lives on track.
- Built zero-to-one CS playbooks across three product lines (WhatsApp, RCS, PX), adopted org-wide, and ran product demos, feature pitches, and enablement that accelerated adoption by tying setup and use-case design to each customer's growth priorities.
- Fast-tracked Netcore's national RCS rollout, running customers through use-case discovery and message-variant testing on event-based billing accounts to shorten time to full-volume go-live, delivering 4X volume growth and an average 8X ROI versus existing channels.
- Earned 3x Star Performer of the Quarter and co-won four industry awards tied to engagement and retention outcomes: ET Brand Disruption (StarQuik), e4m Pitch BFSI (BAGIC), ET Martech+ and MTA Marketech Asia (Plum Goodness).
